

The image shows a top-down view of a rectangular circuit board with a light gray background. A thick black border surrounds the board. White traces form a complex network: a large loop on the left and top, a vertical line on the right, and a diagonal line at the bottom right. Various components are represented by black symbols: a 6-pin header at the top left, a 6-pin header at the bottom center, two 5-pin headers at the bottom right, and several circular pads and small dots. The word "IROBOT" is printed in the center.

IROBOT
